
ENVIRONMENTAL POLICY

Fasset Ltd

Langstone Technology Park, Langstone Rd, Havant, PO9 1SA

www.langtp.com T: 023 9249 7000

Fasset aim to provide first-class property management services and project management to customers. We are committed to reducing the environmental impact of our activities to a practical minimum, which includes waste management, energy provision, construction and refurbishment projects, maintenance and housekeeping. We ultimately aim to enhance our environmental performance through the continual improvement of our environmental management system, and will achieve this by:

- Fulfilling compliance obligations, such as environmental regulations and codes of practice to which we subscribe and which relate to our environmental responsibilities. Conforming to the requirements of ISO 14001 and customer contractual obligations.
- Continually monitoring legislative changes, and communicating them to employees and where applicable customers and suppliers.
- Educating all Fasset employees, and where applicable customers and suppliers to create awareness and a thorough understanding of environmental responsibility based on our EMS requirements.
- Continually improving the business processes, services and technologies used across our sites.
- Investigating energy consumption reduction initiatives; in particular energy derived from fossil fuels. This includes using energy saving fittings and equipment during construction/refurbishment projects.
- Actively seeking opportunities to prevent pollution by reducing, reusing and recycling waste.
- Minimising water consumption and preventing erroneous use.
- Minimising the risk of chemical pollution.
- Using a lifecycle perspective to proactively manage our potential impacts through regular review of our Aspects and Impacts Register, to reflect the current position of the business at any one time.
- Incorporating environmental commitment and responsibility into all business operations, including procurement activities where we will endeavour to source local and sustainable products wherever possible.
- Implementing policies and procedures to reduce our carbon footprint by encouraging modes of transport that will have a positive impact on the environment.

Fasset will communicate and make this policy readily available to our employees, customers, contractors, suppliers and any interested parties in order to create awareness and to demonstrate our commitment to environmental improvements. We will periodically evaluate the compliance of this policy by conducting rigorous audits and self-assessments to ensure we meet our environmental objectives and targets.

Ellie Slater – Quality & Environmental Coordinator, Fasset Ltd
